## Empyreumatic expression “par excellence”

A developed aromatic expression, enhancing intense, structured French oak character and toasted notes. **INTENSE®** has a proactive effect on wines during barrel ageing, adding a dense range of aromas. More energy during the toasting process provides the necessary macromolecules for structured, accentuated wood/wine exchanges.

### Profile & Aroma

**INTENSE®** is a barrel which will provide aromatic expression from the first weeks of barrel ageing:

- Natural stabilisation of the wine's colour (deeper, more intense) due to the exchange of macromolecules
- Toasting that encourages wood/wine exchanges which substantially degrade the initial layers of the oak staves
- The hydrolysis of the wood is mechanically assisted, providing obvious “new oak barrel” notes on the palate
- High temperature extraction produces Maillard reactions with sugary-sweet retro-olfaction notes
- Nose with obvious empyreumatic notes

### Recommendations

- For conventional barrel maturation and non-conventional (from 6 to 10 months)
- Mainly red grape varieties
- Also suitable for white varieties
- For densely structured wines with strong character from barrel ageing

# CADUS

Taste Unique

### Origin & Selection

- A blend of selected French oak staves with organoleptic properties with strong aromatic agents such as vanillin or lactones

### Static stabilisation

- All staves are seasoned in the open air for a period of 30 months

### Toasting

- M++ Type: slow and deep oak extraction
- Pur® process
